Mr. John W. Dickenson
67 Breimba Street
Grafton, New South Wales
Australia

Dear Mr. Dickenson:

Our mutual friend Robin Bisshop has told me about your glider and I would be interested in getting as much information about it as you could conveniently send. We are always glad to hear from people who have built and flown parawings, and there are several.

We are enclosing some papers that will give you a little information about the history and applications of parawings in this country.

Sincerely,

Francis M. Rogallo
